

MAILING FORM FOR NON-IMPACT PRINTING

ABSTRACT OF THE DISCLOSURE

5 A mailing form for facilitating the mailing of a document is disclosed, the mailing form comprising a first panel, a second panel, and, a third panel of substantially the same area, each panel separated by a horizontal fold line. The mailing form includes a top ply of the mailing form and a document in the second panel. The mailing form further includes a bottom ply coupled to the top ply and
10 a frame portion of the top ply. The mailing form further includes an adhesive on the outer edges of the front of the bottom ply extending over the second and third panel. The mailing form further includes a first horizontal fold line between the first and second panels and a second horizontal fold line between the second and third panels. When the mailing form is in folded form, the document in the
15 second panel is securely situated between the first and third panel.
